

TESTIMONIAL

To Whom It May Concern

I purchased an illuminated street address which is solar powered and could not believe the response from my friends and family who always enquire about this brilliant product when visiting my home.

I have positioned the solar powered street address on my garage wall for easy identification by emergency services. Being in the job myself, I know now that finding my home, in an emergency, will be a walk in the park for “tired eyes crews.”

Returning home after an afternoon shift to find the solar light still burning brightly at 1 in the morning confirms that my small investment payed off.

I took the liberty of visiting your website. Thank you DS NUMBERS for making our lives/ jobs easier.

Sincerely
Ryan Reedy (paramedic)
